(54) Title: TRANSPARENT AND POLARIZING VISION ELEMENT HAVING AREAS WHICH ARE ASSOCIATED WITH
POLARIZATION FILTERS THAT ARE RESPECTIVELY VERTICALLY AND HORIZONTALLY ORIENTED

(54) Titre : ELEMENT DE VISION TRANSPARENT ET POLARISANT AYANT DES ZONES ASSOCIEES A DES FILTRES
DE POLARISATION ORIENTES RESPECTIVEMENT VERTICALEMENT ET HORIZONTALEMENT

(57) Abstract: A transparent and
polarizing vision element (2) divided
into several areas. At least two
of said areas are associated with
a luminous polarization filter. The
light flowing through the element
is allocated differently for two
the areas according to a direction
of polarization of the light. At
least one polarization filter is
oriented vertically, and at least
one polarization filter is oriented
horizontally in relation to the usual
position of the element.

(57) Abrégé : Un élément de vision

transparent et polarisant (2) est divisé en plusieurs zones. Deux au moins des zones sont associées à un filtre de polarisation lumineuse. La lumière traversant l'élément est affectée différemment pour deux desdites zones en fonction d'une direction de polarisation de ladite lumière. Au moins un filtre de polarisation est orienté verticalement, et au moins un filtre de polarisation est orienté horizontalement par rapport à la position d'usage de l'élément.
